FORM 2
MCH BUDGET DETAILS FOR FY 2005

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: OH

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 23,310,577

A.Preventive and primary care for children:

\$ 9,398,995 (40.32%)

B.Children with special health care needs:

\$ 7,681,030 (32.95%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 659,963 (2.83%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 2,905,677

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 23,984,359

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 4,227,065

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 23,812,983

\$ 28,211,424

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 54,427,678

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 202,274,718

h. AIDS: \$ 16,762,266

i. CDC: \$ 1,344,631

j. Education: \$ 15,361,800

k. Other: \$

Other Fed. Grants \$ 8,989,485

 \$

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 244,832,900

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 299,260,578

FORM NOTES FOR FORM 2

Explanation of note listed for "other".

We have used the "field note" capacity of the electronic BG application to insert explanatory information, which cannot placed on the regular form due to size limitations. In this instance line nine of Form 2 asks for a listing of federal "funds under the control of the person responsible for the administration of the Title V program." There follows a series of sub-lines identifying various federal funding sources. Line "9K" is reserved for "other." In the Ohio application, this line is used to provide the total amount of other federal funds under the control of the Title V administrator. The field note was used to list individual grants comprising the total listed on line 9K.

FORM NOTES FOR FORM 3

the 2003 budgeted amount for other federal funds (line 8) should be 227,771,000. The total (line 9) should equal 293,185,397.

FIELD LEVEL NOTES

1. **Section Number:** Main
Field Name: UnobligatedBalanceExpended
Row Name: Unobligated Balance
Column Name: Expended
Year: 2002
Field Note:
Only expended 2,203,864 of unobligated balance. The balance is used to help support MCH programs during the first quarter of the new federal fiscal year, while waiting for the MCH NOA.
2. **Section Number:** Main
Field Name: UnobligatedBalanceExpended
Row Name: Unobligated Balance
Column Name: Expended
Year: 2003
Field Note:
We have spent down our lapse amount by approx. 521,000. Ohio plans for a lapse each year to allow us to continue programs at the beginning of each federal fiscal year (October 1) while we wait for our federal notice of award. This enables Ohio to continue to provide services to the MCH population without a break in service.
3. **Section Number:** Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2002
Field Note:
Due to State Budgetary cuts, less dollars were available.

FORM NOTES FOR FORM 5

Ohio has made a concerted effort to bring its budget more in line with the MCH service category pyramid.

In Ohio's preparation of form 5, Ohio uses the Ohio CFHS service pyramid as a proxy. The CFHS service pyramid reflects how dollars are budgeted and expended in each category for the CFHS population which mirrors the MCH population.

Basically, Ohio separates budgeted MCH services that are clearly defined as direct services from the equation (later added back into the equation). The balance of the MCH budget is distributed among the pyramid categories using the breakout listed in the Ohio CFHS service pyramid. The clearly defined direct services are then added to the calculated direct service amount to arrive to a total direct service amount. Hence we arrive at a total amount for direct, enabling, population, and infrastructure services.

FIELD LEVEL NOTES

1. **Section Number:** Main
Field Name: DirectHCExpended
Row Name: Direct Health Care Services
Column Name: Expended
Year: 2002
Field Note:
Can be attributed to state budgetary reductions.
2. **Section Number:** Main
Field Name: EnablingExpended
Row Name: Enabling Services
Column Name: Expended
Year: 2002
Field Note:
Can be attributed to state budgetary reductions.
3. **Section Number:** Main
Field Name: EnablingExpended
Row Name: Enabling Services
Column Name: Expended
Year: 2003
Field Note:
In sfy 2003, Ohio continued to experience budget cuts. Therefore, overall state funds available to support MCH programs have been reduced from original planned support.
4. **Section Number:** Main
Field Name: PopBasedExpended

Infants < 1 year old	147,832	36.4		31.3	7.8	24.5
Children 1 to 22 years old	67,219	66.5		25.6	7.9	
Children with Special Healthcare Needs	31,792	51.0		37.0		12.0
Others	127,936	24.6		54.1	21.3	
TOTAL	390,685					

FORM NOTES FOR FORM 7

Form Notes for Form Form7

Source MATCHr data: October 1, 2002 - September 30, 2003. Payment types, ages and pregnancy status for Family Planning clients as of the last visit. Clients receiving services at more than one agency are duplicated. Includes pregnant Family Planning clients. Clients with two pregnancies in the same FFY are listed twice. Others: include Bureau of Oral Health Services Sealant Program clients, Bureau of Child and Family Health Services Speciality Clinics clients, Family Planning clients over age 22 and Primary and Rural Health Tobacco and State Fund Services. Primary and Rural Health Tobacco and State Fund Services were provided to pregnant women (2,648), women (59,631, children less than one year old (2,549), and children 1 - 18 year old (19,309).

Primary source of coverage reflects Family Planning clients only. For Children with Special Health Care Needs, primary source of coverage under Title XIX includes Title XXI. NOTE: BCFHS specialty clinic numbers are duplicated counts; the Medicaid percent for this category is based on the results of a survey given to a sample of clinic clients.

FIELD LEVEL NOTES

- Section Number:** Main
Field Name: Children_0_1_XIX
Row Name: Infants <1 year of age
Column Name: Title XIX %
Year: 2005
Field Note:
Percent of infants covered by Title XIX reflects percentage of all infants born in 2002.

FORM NOTES FOR FORM 11

None

FIELD LEVEL NOTES

1. **Section Number:** Performance Measure #1
Field Name: PM01
Row Name:
Column Name:
Year: 2005
Field Note:
Data source: ODH Laboratory data for 2002 cases. Calendar year data. Numerator is the number of infants who received follow-up. Denominators are those screened and confirmed.
2. **Section Number:** Performance Measure #2
Field Name: PM02
Row Name:
Column Name:
Year: 2005
Field Note:
The data reported in 2002 have pre-populated the data for 2003 for this performance measure.
3. **Section Number:** Performance Measure #3
Field Name: PM03
Row Name:
Column Name:
Year: 2005
Field Note:
The data reported in 2002 have pre-populated the data for 2003 for this performance measure.
4. **Section Number:** Performance Measure #4
Field Name: PM04
Row Name:
Column Name:
Year: 2005
Field Note:
The data reported in 2002 have pre-populated the data for 2003 for this performance measure.
5. **Section Number:** Performance Measure #5
Field Name: PM05
Row Name:
Column Name:
Year: 2005
Field Note:
The data reported in 2002 have pre-populated the data for 2003 for this performance measure.
6. **Section Number:** Performance Measure #6
Field Name: PM06
Row Name:
Column Name:
Year: 2005
Field Note:
The data reported in 2002 have pre-populated the data for 2003 for this performance measure.
7. **Section Number:** Performance Measure #7
Field Name: PM07
Row Name:
Column Name:
Year: 2005
Field Note:
Numerator: Data source: Estimated percent of Ohio children 19-35 months of age with vaccination coverage (series 4:3:1:3:3 = 4 doses DTaP or DTP, 3 doses polio, 1 dose MMR, and 3 doses Hib.) from the U.S. National Immunization Survey, (MMWR Q1/2002 - Q4/2002. Percent value is + or - 5.

Data for the denominator from the U.S. census bureau. The numerator was generated by applying Ohio's CDC percentage of vaccination coverage to the denominators.
8. **Section Number:** Performance Measure #8
Field Name: PM08
Row Name:
Column Name:
Year: 2005
Field Note:
Data for denominator from US Census Bureau, population estimates.
9. **Section Number:** Performance Measure #9
Field Name: PM09
Row Name:
Column Name:
Year: 2005
Field Note:
Data drawn from an annual survey of 25 sentinel schools providing a population based estimate for the state.
10. **Section Number:** Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2005
Field Note:
Numerator: Vital statistics death records from 2002 (beginning with 1999 are coded using ICD-10)
Denominator [Census 2000]: from U.S. Census Bureau
Infants < 1 year are excluded from numerator and denominator for 1999 and 2000
11. **Section Number:** Performance Measure #11
Field Name: PM11
Row Name:
Column Name:

Year: 2005

Field Note:

Numerator: imputed from applying 63.7 percent of mothers breastfeeding at hospital discharge reported from the 2002 "Mothers' Survey" Ross Products Division, Abbott Laboratories, Inc., to the number of 2002 occurrent births.

Denominator: Ohio occurrent births 2002.

12. Section Number: Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2005

Field Note:

Numerator: was derived from the hearing assessment forms of the universal newborn screening not in effect in 2002. This data only reflects infants identified with risk factors who went on for an actual hearing test.

13. Section Number: Performance Measure #13

Field Name: PM13

Row Name:

Column Name:

Year: 2005

Field Note:

2002 Current population survey: Ohio's numerator was derived from averaging the number of children under age 18 who are uninsured according to the current population survey. The average of 2001 and 2002 was used as the numerator. The denominator is from census data - number of children in the state under 18.

14. Section Number: Performance Measure #14

Field Name: PM14

Row Name:

Column Name:

Year: 2005

Field Note:

SFY 2002 data: The denominator is actual eligibles up to 21 but not including 21. SFY data is July 1, 2001 through June 30th, 2002.

15. Section Number: Performance Measure #15

Field Name: PM15

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data.

16. Section Number: Performance Measure #16

Field Name: PM16

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data. Vital statistics death records beginning with 1999 are coded using ICD-10.

17. Section Number: Performance Measure #17

Field Name: PM17

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data.

18. Section Number: Performance Measure #18

Field Name: PM18

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data. The denominator is less than the total birth because we excluded all missing data.

19. Section Number: State Performance Measure #1

Field Name: SM1

Row Name:

Column Name:

Year: 2005

Field Note:

PRAMS data is available for 1999, 2000 and 2001. Data is for live births; and for in-state births to residents.

The year 1999 represents the change from program data used to measure this indicator to the use of the population-based PRAMS data. Prior year data was from Child and Family Health Services (CFHS). Targets are changed to reflect the change in data source and will be monitored and re-evaluated as experience with these data increases.

Corrections were made to the denominators used for 1999 and 2000. For 1999, it changed from 148547 to 138784. For 2000, it changed from 150116 to 148928.

20. Section Number: State Performance Measure #5

Field Name: SM5

Row Name:

Column Name:

Year: 2005

Field Note:

Data source: Ohio's CDC Pediatric Nutrition Surveillance System [PedNSS]. Included infants and children aged less than 5 years. The visible difference between 2000 and 2001 data was due to a change in methodology (by CDC) for data analysis. Previous year's data were based on visits, allowing duplicate information on individual children. For 2001 and 2002, each child was represented only once and therefore data were unduplicated, accounting for the low numbers.

21. Section Number: State Performance Measure #7

Field Name: SM7

Row Name:

Column Name:

Year: 2005

Field Note:

Sentinel Schools

Background: The Ohio Department of Health (ODH) has conducted oral health surveys of schoolchildren since 1987-88. The 1987-88 and 1992-93 surveys were DMFS (Decayed, Missing, Filled Surface) epidemiological surveys of a statewide probability sample. In 1998-99, the ODH revised its methodology to a screening survey that mirrored the model it was developing for the Association of State and Territorial Dental Directors. In addition, the sampling was done at the county level and was limited to grades 1-3, where the previous survey included additional grades.

After the 1998-99 survey was completed, the ODH contracted with the Ohio State University Biostatistics program to select a purposive sample of 25 schools. The sample would be both representative of the full sample of 336 schools and would be limited to schools that were cooperative in 1998-99. ODH used a subjective 5-point scale to assess each school's level of cooperation. Only schools in the two highest categories were considered for the sentinel school sample. Only third graders are screened in the sentinel surveys.

Purpose: The purposes of selecting the sample of sentinel schools were:

- to generate annual estimates of oral health status between the larger statewide surveys that were conducted at 5-6 year intervals. These estimates would serve two purposes
- ? a basis for required reporting of MCH Block Grant performance measures, and
- ? as part of an oral health surveillance system to examine trends
- to validate the sentinel schools approach by screening the sentinel schools along with the new sample of schools selected for the next large survey (2003-04 or 2004-05).

Dr. Stacey Hoshaw-Woodward, of the OSU Biostatistics Program, developed the model used to select sentinel schools.

22. Section Number: State Performance Measure #9

Field Name: SM9

Row Name:

Column Name:

Year: 2005

Field Note:

[CY 2002]: Levels reflect the highest confirmed test for calendar year 2002. Child may have been tested in previous years.

23. Section Number: State Performance Measure #11

Field Name: SM11

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data.

24. Section Number: State Performance Measure #12

Field Name: SM12

Row Name:

Column Name:

Year: 2005

Field Note:

1. Convene a state level CFR team to develop a standardized protocol for local CFR teams.
2. Work with state level CFR teams to develop training materials, manuals and training sessions for local CFRs.
3. State level team will review annual reports from community based CFR teams and prepare statewide reports.

25. Section Number: State Performance Measure #13

Field Name: SM13

Row Name:

Column Name:

Year: 2005

Field Note:

Data for 2003 is not available yet.

26. Section Number: State Performance Measure #14

Field Name: SM14

Row Name:

Column Name:

Year: 2005

Field Note:

Data source: Data based on Ohio Bureau of Criminal Identification and Investigation Domestic Incidence Datasets. Note that starting in 2002, BCI only reports incidents of DV where violence resulted, regardless of whether the victim was injured in the incident. The difference in figures from last year is due to variations in methodology used to generate data. Due to staff changes, BCI were unable to duplicate methodology developed for last year's figures.

Ohio Incident-Based Reporting System (OIBRS). Numerator included data from 171 OIBRS participating agencies collected from 1-1-2000 - 12-31-2001. The noticeably higher domestic violence figures and the significant difference from last year are due to a change in sources of data.

27. Section Number: State Performance Measure #15

Field Name: SM15

Row Name:

Column Name:

Year: 2005

Field Note:

Data are from a survey to a statewide sample of schools administered every other year. Current data are from the 1999-2000 survey. Data reported in 2001 is the most current data available.

28. Section Number: State Performance Measure #16

Field Name: SM16

Row Name:

Column Name:

Year: 2005

Field Note:

1. The director of health will convene a task force on genetics to review new genetics information.
2. The task force will develop a work plan of activities that will result in a document of recommendations to the director of health.

ODH will develop a state of genetics plan for 2002/2007, incorporating recommendations from the task force.

FORM 12
TRACKING HEALTH OUTCOME MEASURES
[SECS 505 (A)(2)(B)(iii) AND 506 (A)(2)(A)(iii)]
STATE: OH

OUTCOME MEASURE # 01

The infant mortality rate per 1,000 live births.

<u>Annual Objective and Performance Data</u>					
	1999	2000	2001	2002	2003
Annual Performance Objective	7.2	7	7	7	6.9

FORM 13
CHARACTERISTICS DOCUMENTING FAMILY PARTICIPATION IN CSHCN PROGRAMS
STATE: OH

1. Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate.

3

2. Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups.

3

3. Family members are involved in the Children with Special Health Care Needs elements of the MCH Block Grant Application process.

3

4. Family members are involved in service training of CSHCN staff and providers.

3

5. Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member).

3

6. Family members of diverse cultures are involved in all of the above activities.

3

Total Score: 18

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: OH FY: 2005

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce the overall mortality rate of children and adolescents.
2. Reduce the incidence of low birth weight in infants.
3. Reduce the infant mortality rate.
4. Reduce the percentage of children and adolescents who are overweight.
5. Reduce the percentage of adolescents who have had sexual intercourse.
6. Implement policies and strategies to facilitate coordination of services for children with special health care needs (CSHCN).
7. Eliminate gaps in services for CSHCN.
8. Reduce the percentage of children and adolescents who need oral health care and do not receive it.
9. Reduce the percentage of students in grades 9 through 12 who use tobacco.
10. Establish and maintain population-based data for CSHCN.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: OH

SP # 1

PERFORMANCE MEASURE:

The unintended pregnancy rate per thousand in women of childbearing age.

STATUS:

Active

GOAL

To reduce the incidence of unintended pregnancy in women of childbearing age.

DEFINITION

Numerator:

Number of women of childbearing age surveyed through Pregnancy Risk Assessment Monitoring Systems (PRAMS) who indicate that their pregnancy was not intended at the time of pregnancy or was never intended.

Denominator:

Number of pregnant women of childbearing age surveyed through PRAMS multiply quotient by 1,000 express as rate/1,000.

Units: 1000 **Text:** Rate per 1,000

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

PRAMS data

SIGNIFICANCE

Women, particularly women in poverty and adolescents are more likely to experience difficulty raising a child. Their pregnancies are more likely to be high risk. This is in part due to poor socioeconomic conditions; difficulty in accessing medical care; and engaging in risk behaviors such as smoking, alcohol abuse and drugs. Improved conception control would allow women and couples to have children when they feel best prepared socially and financially to assume the responsibilities of parenting.

SP # 5

PERFORMANCE MEASURE:

The percentage of low income children who are overweight.

STATUS:

Active

GOAL

To assure that children achieve appropriate growth potential.

DEFINITION

Numerator:

Overweight children in WIC > 95% WT/HT

Denominator:

All children in WIC who were measured at same point in time (e.g., annually)

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

CDC's Pediatric Nutrition Surveillance System.

SIGNIFICANCE

Retardation of linear growth in infants and preschool children serves as an indicator of overall health and development, but may especially reflect the adequacy of a child's diet. Underweight reflects possible poor diet, infectious disease and/or chronic illness. Full growth potential may not be reached without early identification and intervention. Obesity in children of all ages is on the rise. Overweight acquired during childhood may persist into adulthood and increase the risk for some chronic conditions later in life.

SP # 7

PERFORMANCE MEASURE:

Percentage of 3rd grade children with obvious need for dental care.

STATUS:

Active

GOAL

To prevent or alleviate suffering due to dental pain or infection by assuring prevention and early intervention in the dental disease process.

DEFINITION

Numerator:

Number of third grade children screened who have an obvious need for dental care according to American Dental Association criteria.

Denominator:

Number of third grade children screened.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Bureau of Oral Health Services conducts periodic statewide open-mouth examination surveys. In FY2000, a cadre of sentinel schools will be developed for annual screenings to serve as an indicator of oral health status.

SIGNIFICANCE

Dental disease is common and amenable to early intervention. High risk children can be targeted for extensive preventive strategies. Early dental disease can be reversed and more advanced disease can be treated before it results in pain, infection and the need for more expensive approaches. This measure indicates the extent to which children are receiving dental care.

SP # 9

PERFORMANCE MEASURE:

The percentage of children with elevated blood lead levels as defined by the Centers for Disease Control and Prevention

STATUS:

Active

GOAL

To reduce lead poisoning by assuring identification of children exposed to lead through the implementation, monitoring, and modification of a statewide screening plan

DEFINITION

Numerator:

Number of children birth to 6 years with elevated blood lead levels equal to or greater than 10 ug/dL

Denominator:

Total population screened for lead from birth to 6 years.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Source for data is the Ohio Childhood Lead Poisoning Prevention STELLAR Database. The Ohio Revised Code requires the laboratory reporting of the results of all blood lead analysis.

SIGNIFICANCE

Ohio has approximately 2.7 million housing units having some lead-based paint on the interior and/or exterior surfaces. Approximately 315,000 children live in these potentially hazardous structures. Approximately 8,000 children are identified as lead poisoned annually in Ohio. Children with elevated blood lead levels are at increased risk for behavioral, physiologic and learning problems including, but not limited to, lethargy, diminished ability to learn, various central nervous system disorders, convulsions and even death.

SP # 11

PERFORMANCE MEASURE:

The low birth weight rate (LBW) per 100 live births

STATUS:

Active

GOAL

To reduce the number of low birth weight births

DEFINITION

Numerator:

Number of live births weighing less than 2500 grams

Denominator:

Number of live births

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital records collected by the State of Ohio

SIGNIFICANCE

LBW is the risk factor most closely associated with neonatal death; thus improvements in the infant birth weight can contribute substantially to reductions in the infant death rate. Of all the infants born at low birth weight, the smallest are at risk of dying in their first year. Another important issue is the long term effects of LBW on affected infants who survive their first year, as these infants are more likely to experience long-term developmental and neurologic disabilities than are infants of normal birth weight. Recent increases in LBW are due largely to preterm delivery related to increases in multiple gestation.

SP # 12

PERFORMANCE MEASURE:

Implementation of a statewide Child Fatality Review (CFR) System

STATUS:

Active

GOAL

For local communities to better understand the underlying/contributing factors that result in infant, child and adolescent mortality in order to develop community-based intervention strategies to reduce mortality among infants, children and adolescents.

DEFINITION

Numerator:

N/A

Denominator:

N/A

Units: Text:

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Ohio Vital Records

SIGNIFICANCE

The health of a population is reflected in the health of its more vulnerable members (i.e., infants, children, adolescents). Developing a framework for collection of information on contributing factors of child mortality at the community level will provide a mechanism for the implementation of strategies and programs to decrease mortality rates.

SP # 13

PERFORMANCE MEASURE:

The ratio of black perinatal mortality rate to the white perinatal mortality rate

STATUS:

Active

GOAL

To reduce the disparity (ratio) between black and white perinatal mortality rates

DEFINITION

Numerator:

Black perinatal mortality rate per 1000 black live births + black fetal deaths ≥ 20 weeks gestation

Denominator:

The white perinatal mortality rate per 1000 white live births + white fetal deaths ≥ 20 weeks gestation

Units: 1 **Text:** per 1,000

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Ohio Vital Records

SIGNIFICANCE

The health of infants depends in large part on their health in utero. A fetus with severe defects or growth problems may not be delivered alive. Because only live births are counted in infant mortality rates, perinatal and fetal mortality rates provide a more complete picture of perinatal health than does the infant mortality rate alone.

PERFORMANCE MEASURE:	The reported cases of physical assault by current or former intimate partners (Domestic Violence)
STATUS:	Active
GOAL	To reduce the reported cases of physical assaults by current or former intimate partners
DEFINITION	<p>Numerator: Reported physical assaults by current/former intimate partner</p> <p>Denominator: Population aged 12 years and older</p> <p>Units: 1000 Text: Rate per 1,000</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	National Crime Victimization Survey, U.S. Dept of Justice, Bureau of Justice Statistics for Ohio
SIGNIFICANCE	The nature of intimate partner violence and sexual violence makes such problems difficult to study. Consequently, much remains unknown about the factors that increase or decrease the likelihood that males will behave violently toward females, the factors that endanger or protect females from violence, and the physical and emotional consequences of such violence for females and their children.

SP # 15

PERFORMANCE MEASURE:

Percentage of children in kindergarten and 1st grade failing a vision screen

STATUS:

Active

GOAL

Increase utilization of vision care by children birth to age five years

DEFINITION

Numerator:

Number of children failing a vision screening in Kindergarten and 1st grade

Denominator:

Number of children screened for vision in Kindergarten and 1st grade

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

ODH School Vision and Hearing Survey

SIGNIFICANCE

Abnormal visual acuity is the most common chronic medical condition in children of industrialized nations. Prevalence of abnormal vision findings in children ranges from a prevalence of three percent to as much as 25% depending on the age of the child and vision screening tests used. The need for early detection of vision disorders is widely recognized and stressed due to the irreversible effects of some undetected vision disorders.

SP # 16

PERFORMANCE MEASURE:

Assess the capacity to integrate genomics into public health programs.

STATUS:

Active

GOAL

To incorporate the knowledge of the Human Genome Project and other genetic research into the public's into the public's health through social, ethical, moral and scientific discuaaions and strategies

DEFINITION

N/A

Numerator:

N/A

Denominator:

N/A

Units: 3 **Text:** 5

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The science based on the findings of the Human Genome Project is "The New Genetics". The New Genetics is providing tools and methods to answer questions about health and disease. In the next decade, genetic testing and other genetic technologies will be routine in medical practice. Screening for genetic susceptibilities along with individualized counseling will allow Ohioans to prolong health and avoid disease. The New Genetics will allow the integration of information from studies into exiting public health programs in order to review the traditional public health messages aimed at health promotion and risk reduction. In addition, public health must take a leadership role in the formation of policy and public health policy that are in the interests of the entire population of Ohio.

SIGNIFICANCE

The science based on the findings of the Human Genome Project is "The New Genetics". The New Genetics is providing tools and methods to answer questions about health and disease. In the next decade, genetic testing and other genetic technologies will be routine in medical practice. Screening for genetic susceptibilities along with individualized counseling will allow Ohioans to prolong health and avoid disease. The New Genetics will allow the integration of information from studies into exiting public health programs in order to review the traditional public health messages aimed at health promotion and risk reduction. In addition, public health must take a leadership role in the formation of policy and public health policy that are in the interests of the entire population of Ohio.

SO # 2

OUTCOME MEASURE:

The adolescent death rate per 100,000 adolescents aged 15-19 years.

STATUS:

Active

GOAL

To reduce the death rate of adolescents aged 15-19

DEFINITION

Numerator:

Number of deaths among adolescents aged 15-19

Denominator:

Number of adolescents aged 15-19

Units: 100000 **Text:** Rate per 100,000

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital statistics and census information

SIGNIFICANCE

There were 14,663 deaths in 1996 among adolescents aged 15-19 years, for a death rate of 78.6 per 100,000. The leading cause of death for adolescents in this age group was motor vehicle crashes at 28.55 deaths per 100,000, or 36.3 percent of total deaths. Other unintentional injuries (such as falls, drownings, and poisonings) caused 7.64 deaths per 100,000 (9.7 percent); homicides caused 15.66 deaths per 100,000 (19.9 percent); suicides caused 9.73 deaths per 100,000 (12.4 percent); and AIDS caused 0.26 deaths per 100,000 (0.3 percent). Consequently, a majority (78 percent) of the total mortality in this age group can be attributed to unnecessary (that is, preventable) causes. The remaining 22 percent of deaths among adolescents aged 15 to 19 years resulted mostly from malignant neoplasms which caused 3.67 deaths per 100,000 (4.7 percent); diseases of the heart caused 2.18 deaths per 100,000 (2.8 percent); birth defects caused 1.02 deaths per 100,000 (1.3 percent); and a combination of other causes caused 8.42 deaths per 100,000 (10.7 percent).

FIELD LEVEL NOTES

1. Section Number: Health Systems Capacity Indicator #01

Field Name: HSC01

Row Name:

Column Name:

Year: 2005

Field Note:

Data source: Ohio Hospital Association (OHA) Statewide Clinical and Financial database, 2002. Numerator: the number of hospital discharges for Ohio residents age <5 years for 2002.

Denominator: 2000 U.S. Census population of Ohio children <5 years old.

2. Section Number: Health Systems Capacity Indicator #02

Field Name: HSC02

Row Name:

Column Name:

Year: 2005

Field Note:

SFY 2002] Ohio Health Plans. SFY 2002] Ohio Health Plans. Calculation is based on those children who turned one during SFY 2002 (July 1, 2001 - June 30, 2002). Each child's records for those previous 12 months were reviewed. Used HEDIS code definitions. In the past, the HEDIS measure looked at all children and calculated a rate based upon the aggregate number of months that the child was eligible. For year 2002, all children who had a visit was counted regardless of number of months. Program is child's enrollment during their 12th month.

3. Section Number: Health Systems Capacity Indicator #03

Field Name: HSC03

Row Name:

Column Name:

Year: 2005

Field Note:

SFY 2002] No CHIP program before 1998. [SFY 2002] Ohio Health Plans. Calculation is based on those children who turned one during SFY 2002 (July 1, 2001 - June 30, 2002). Each child's records for those previous 12 months were reviewed. In the past, the HEDIS measure looked at all children and calculated a rate based upon the aggregate number of months that the child was eligible. For year 2002, all children who had a visit was counted regardless of number of months. Used HEDIS code definitions. Program is child's enrollment during their 12th month.

4. Section Number: Health Systems Capacity Indicator #04

Field Name: HSC04

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data. The denominator is less than the total birth because we excluded all missing data.

5. Section Number: Health Systems Capacity Indicator #07

Field Name: HSC07

Row Name:

Column Name:

Year: 2005

Field Note:

Both the numerator and denominator were calculated using HEDIS standard measurements for SFY 2002.

Total eligibles include children aged 6 through 9 with at least 11 months of continuous eligibility (30 day allowable break) and must have been enrolled on June 1st 2002.

Total served is defined by the HEDIS measure which includes:

1. Specific CPT and ICD-9 codes.
2. Children aged 6 through 9 according to eligibility guidelines above.
3. Dental treatment received through dental provider by provider type.

All datasets represents SFY 2002 (July 1st 2001 - June 30th 2002).

6. Section Number: Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2005

Field Note:

The numerator for this equation is obtained by the Bureau for Children with Medical Handicaps (BCMH) via a data match from Ohio Department of Jobs and Family Services (ODJFS). BCMH confirmed the numerator with ODJFS. In addition, BCMH has had an aggressive public awareness campaign.

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #05
(MEDICAID AND NON-MEDICAID COMPARISON)
STATE: OH

INDICATOR #05 <i>Comparison of health system capacity indicators for Medicaid, non-Medicaid, and all MCH populations in the State</i>	YEAR	DATA SOURCE	POPULATION		
			MEDICAID	NON-MEDICAID	ALL
a) Percent of low birth weight (< 2,500 grams)	2002	Matching data files	<u>0</u>	<u>0</u>	<u>8.3</u>
b) Infant deaths per 1,000 live births	2002	Matching data files	<u>0</u>	<u>0</u>	<u>7.9</u>
c) Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester	2002	Matching data files	<u>0</u>	<u>0</u>	<u>87.8</u>
d) Percent of pregnant women with adequate prenatal care (observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])	2002	Matching data files	<u>0</u>	<u>0</u>	<u>86.5</u>

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06 (MEDICAID ELIGIBILITY LEVEL)
STATE: OH

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) Infants (0 to 1)	2002	<u>200</u>
b) Medicaid Children (Age range <u>1</u> to <u>19</u>) (Age range <u> </u> to <u> </u>) (Age range <u> </u> to <u> </u>)	2002	<u>200</u> <u> </u> <u> </u>
c) Pregnant Women	2002	<u>150</u>

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06 (SCHIP ELIGIBILITY LEVEL)
STATE: OH

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) Infants (0 to 1)	2002	<u>200</u>
b) Medicaid Children (Age range <u>1</u> to <u>19</u>) (Age range <u> </u> to <u> </u>) (Age range <u> </u> to <u> </u>)	2002	<u>200</u> <u> </u> <u> </u>
c) Pregnant Women	2002	<u>150</u>

FORM NOTES FOR FORM 18

None

FIELD LEVEL NOTES

1. **Section Number:** Indicator 05
Field Name: LowBirthWeight
Row Name: Percent of ow birth weight (<2,500 grams)
Column Name:
Year: 2005
Field Note:
Ohio Medicaid Program states that medicaid program data are not available at this time.
2. **Section Number:** Indicator 05
Field Name: InfantDeath
Row Name: Infant deaths per 1,000 live births
Column Name:
Year: 2005
Field Note:
Ohio Medicaid Program states that medicaid program data are not available at this time.
3. **Section Number:** Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2005
Field Note:
Ohio Medicaid Program states that medicaid program data are not available at this time.
4. **Section Number:** Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care
Column Name:
Year: 2005
Field Note:
Ohio Medicaid Program states that medicaid program data are not available at this time.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: OH

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	No
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	1	No
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	2	Yes
Annual birth defects surveillance system	1	No
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: OH

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other: Youth Tobacco Survey	3	No

HEALTH SYSTEMS CAPACITY INDICATOR #09C (Data Capacity) Overweight/Obesity
(The Ability of the State to Determine the Percent of Children Who are Obese or Overweight)

Data Source	Does your state participate in this survey/data source? (Select 1 - 3)*	Does your MCH program have direct access to this electronic database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Pediatric Nutrition Surveillance System (PedNSS)	3	Yes
WIC Program Data	3	Yes
Other: 		

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

Annual Linkage of Birth Certificates and Newborn Screening Files; and Annual Birth Defects Surveillance System: In active progress. Currently working on methodologies for these. Anticipate collecting data by the end of the year.

FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A

Field Name: Discharge

Row Name: Hospital discharge survey for at least 90% of in-State discharges

Column Name:

Year: 2005

Field Note:

The MCH program has access to subsets of the Ohio Hospital Association database, per a Memorandum of Understanding with the Ohio Department of Health.

2. **Section Number:** Indicator 09A

Field Name: BirthDefects

Row Name: Annual birth defects surveillance system

Column Name:

Year: 2005

Field Note:

The MCH Program has recently received a CDC grant to develop a birth defects information system; data will not be available for at least a year.

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: OH

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.
